Profile

Im an Undergraduate Student majoring in Informatics Engineering at Parahyangan Catholic University with experience in developing websites through academic and freelance projects. Skilled in Full-Stack Web Development, and previously built an AutoCaption AI system utilizing audio and video processing. Highly adaptable, collaborative, and committed to delivering innovative and efficient digital solutions.

Education

Parahyangan Catholic University | *Informatics Engineering*

Work Experiences

Python Developer – AI AutoCaption System - Freelance

Jun2025 - Aug 2025

Built an end-to-end AutoCaption AI system for an International Client using Python. The project automatically generates captions from videos by combining speech-to-text transcription and facial emotion detection.

Key Contributions:

- Developed a modular system using OpenAI Whisper for speech recognition and transcription.
- Integrated dlib for face detection and basic emotion tracking using facial landmark analysis.
- Utilized librosa for extracting emotional features from audio such as pitch and energy.
- Combined video, audio, and emotion overlays using moviepy and opencv-python to generate output videos with dynamic captions.
- Created an environment setup guide for reproducibility using Python virtual environments and ensured compatibility with Windows-based systems.
- Emphasized real-time processing, clean interface design, and customizable subtitle generation.
- Technologies Used: Python, OpenAI Whisper, dlib, librosa, moviepy, OpenCV, NumPy, Pillow, imageio-ffmpeg

Company Profile Website - CV. Dwijaya Sukses Bersama - Freelance

Jan 2025 - Jan 2025

Developed a responsive company profile website for a plywood manufacturing company to present its identity, products, and services in a clean and professional layout.

- Designed and developed a responsive website tailored for a plywood manufacturing business.
- Implemented custom front-end development to create a fast and user-friendly interface.
- Showcased company identity, products, and services with a professional and clean design.
- Applied web performance optimization to improve speed and usability.
- Collaborated with stakeholders to deliver a tailored digital solution aligned with business needs.

Keywords: Web Development, Front-End Development, Responsive Design, HTML, CSS, JavaScript, UI/UX, Website Optimization, Custom Development, Company Profile Website

Organizational Experiences

Head of Event for Informatics Sport & E-Sports Competition (ISEC) 2023

Organized an event under the Informatics Student Association, hosting various sports-related activities.

- Collaborated with all divisions to plan and design the event structure.
- Assigned roles and job descriptions for each staff member.
- Managed university permissions for event execution.
- Acted as a liaison between the university and the organizing committee.

Vice Coordinator Logistics of FTIS Graduation Day 2023

FTIS Graduation Day is an event held to celebrate the graduation of FTIS students.

- Coordinated with the university for permissions to borrow all necessary equipment and supplies for the event.
- Tracked purchased or borrowed items for accountability purposes.

Other Experience, Skill, & Language

- Other Experience : Web Scraping Project – Parahyangan Catholic University, IoT-Based Rusunami System, Laundry Management System, Point of Sale (POS) System, E-commerce Website, QR-based Wedding System
- Skill : Artificial Intelligence(AI), Machine Learning, Front-End Development, React.js, Node.js, SQL, Data Science, Web Development, Python
